

Earning profits from a film program takes equipment and training, both of which are provided by IDS Automotive.

Equipment

Pattern Software: A database of window shapes and sizes for every year, make, and model.

Plotter: Cuts the tint to the precise shape and size of a vehicle's windows.

Training

We will provide in-person, hands-on installation training by a certified trainer to teach your technicians how to install automotive tint and Door Defense (PPF) as well as operate the pattern software and plotter. In addition, we will provide ongoing onsite training when you add installers or experience labor turnover.

**We can also provide the appropriate addendum stickers and Monroney covers for legal compliance.*

Ready to Get Started?

We make moving forward easy.

All we ask is for a pre-load commitment of new vehicle inventory along with some additional items:

Designated clean environment for installation

Laptop with continuous internet connection

Suitable installer candidate(s)

Dealership Profitability Program

Pre-load programs for Fixed Ops and Sales

Retail programs for F&I and the Service Drive

New car dealer profitability has been under pressure for many years, especially in an environment of reduced inventory levels. Dealerships continue to seek ways to increase profits and add value to their stock of new and used vehicles. IDS Automotive offers a comprehensive Tint and Paint Protection Film program that has been specifically designed for dealerships.

Sustainable Gross

Low COGS

Create Customer Retention

Door Defense

Global Door Defense is a line of invisible films that protect a vehicle's paint. Door cups, door edges, and door sills are often subjected to wear and tear, the proof of which is scratched or chipped paint. Installing Door Defense is lucrative for the dealer and takes only minutes to do!

DOOR CUP GUARD

DOOR EDGE GUARD

DOOR SILL GUARD

Automotive Tint

Dealerships love Jet Black for its high quality, low price, and lifetime warranty. Installers love it for its ease of installation.

Many consumers take their newly purchased vehicles to the local tint shop to have automotive window film installed. There is no reason why the selling dealer can't cash in on that revenue.

IDS Automotive offers dealerships a high quality, easy to install, and state legal automotive window tint. Our Jet Black Automotive Window Film has an attractive appearance on the window while providing good heat rejection and color stability, all at an affordable price. Featuring a lifetime warranty, Jet Black is metal-free and will not interfere with various next generation technologies such as satellite radio or GPS.

To simplify the installation process, the film is pre-cut to the shape and dimensions of a particular vehicle's windows.

Features & Benefits

Lifetime Warranty
Guaranteed for life*

Multiple VLTs
Legal in many states**

Heat Rejection
Reduces solar heat gain

Privacy
Darkens windows

UV Protection
Blocks 99% UV rays

Easy to Install
Heat shrinks just like other films

*Please see warranty for specific terms and conditions.
**Please obey all federal, state, and local automotive tint laws.

Global Door Defense provides clear protection against paint nicks, scratches, and scuffs. It is manufactured from paint protection film (PPF), which is an 8-mil thick, invisible, high gloss, urethane film that is applied to the painted surfaces of a vehicle to **protect against damage caused by wear and tear, gravel, salt, tree sap, bugs, and bird droppings.**

Door Defense is pre-cut for door edges, door sills, and door cups and is available in convenient blister packs.
