Bring surfaces to life with over 600 finishes

What is Belbien?

Belbien Architectural Film is conformable vinyl that simulates a wide variety of natural and synthetic finishes, such as wood, stone, marble, granite, metal, leather, and many others. Available in over 600 patterns, Belbien can be the perfect substitute for, or complement to, visually appealing building materials. Belbien is self-adhering, can be installed on flat and curved surfaces, and is a resilient non-porous product making it ideal for cleanability.

See how Belbien Architectural Finishes are installed.

Benefits of Belbien

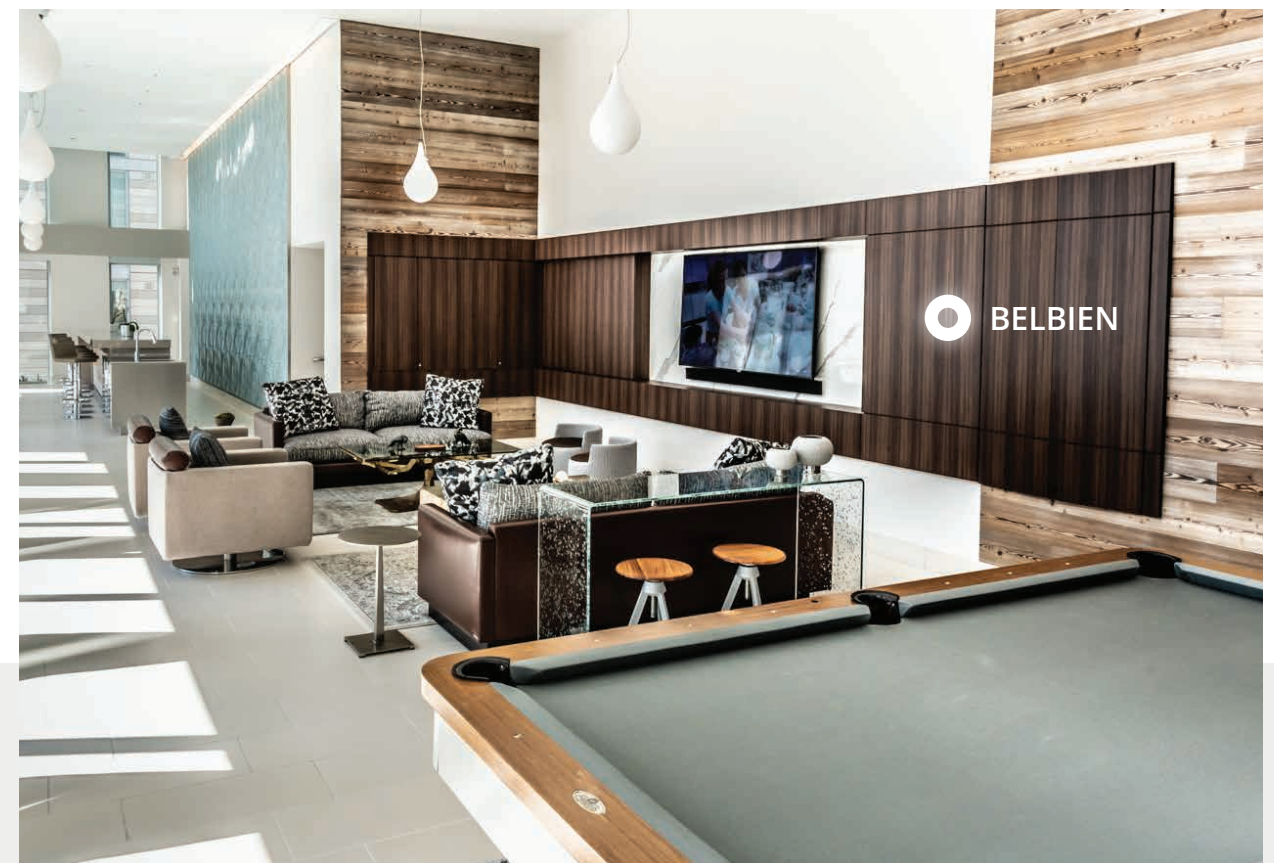

- 
Value Engineered
 Belbien's adhesive allows its users to modernize existing surfaces such as doors, wall panels, reception desks, and much more, in a cost effective manner.
- 
Minimal Disruption
 Belbien Architectural Film avoids the logistics involved in demolition of old substrates and can be installed after hours when spaces are unoccupied.
- 
Go Green
 Modernizing old surfaces keeps them out of landfills.
- 
Upscale Look & Feel
 Belbien Architectural Film comes in over 600 patterns and has embossed grain so it looks and feels like the real thing.
- 
Cleanability
 Belbien is a resilient non-porous vinyl product that resists solvents and liquids. It is ideal for environments that require non-porous surfaces that are constantly cleaned.

Bring New Life to Old Millwork

- Surface reception desks with Belbien to ensure a cleanable non-porous surface.
- Avoid the cost of removing old millwork.
- Minimize downtime to your space with after hours installations.

 BELBIEN

Save Your Panels and Columns

- Significant cost savings as Belbien can be applied directly on top of outdated panels and columns.
- Belbien is perfect for lobbies with old marble or stone walls.
- Get creative with grain direction and over 600 patterns to work with.
- Avoid demolition and disruption to your space.
- Save our planet and keep old substrates out of landfills.

Refresh Your Elevators with Belbien

Cost-effectively achieve an upscale look on elevator jambs and entries.

Little to no downtime as all work can be completed after hours.

Save time and money by avoiding existing panel removal and reinstallation.

No need to recalibrate the elevator cab.

NuovoDoor is an innovative door modernization system that transforms old doors to new. Available in over 600 modern finishes, NuovoDoor is a cost-effective alternative when looking to source new doors for your property.

With minimal disruption to your space, the NuovoDoor team will surface your existing doors onsite **making them look brand new.**

Benefits

- Significant cost-savings when compared to door replacement.
- Apply onsite with minimal disruption to the space.
- Green Solution: Keep existing doors out of the landfill.
- Looks and feels like the real thing.
- No need to replace the existing door jamb.
- Can be installed on any size door.
- Over 600 finishes to choose from.
- Get creative with grain direction and profile selection.
- Easier to repair than laminate or real wood doors.

Benefits of Belbien in Healthcare

- Cost-effective alternative to traditional construction.
- Existing furniture, fixtures, patient headboards, tables, counters, and cabinets can be repurposed and given a new look in a quick and quiet fashion.
- Belbien is a resilient non-porous vinyl product that resists solvents and liquids. It is ideal for environments that require non-porous surfaces that are constantly cleaned.
- When physical surroundings are improved, the morale of patients and personnel is likely to improve as well, helping a healthcare facility achieve its ultimate goal.

BEFORE

Benefits of Belbien for Cruise Lines

- Reuse and recover existing doors, furniture, partitions, and other fixtures.
- Easily and quickly installed during drydock or while at sea.
- Save money when updating ship interiors compared to traditional construction methods.
- Can be custom printed, pairing the text or design of your choice with one of 600+ patterns.
- IMO Certified architectural finishes that can be applied to any smooth and non-porous surface.

Marine

Refresh Cruise Ships Efficiently & Cost-Effectively

The aesthetics of a cruise ship's interior spaces, whether guest rooms or common areas, help determine whether a passenger's travel experience is a positive one. Belbien is a durable line of IMO Certified architectural finishes that can be applied to any smooth and non-porous surface of a cruise ship. Installation is quick and cost-effective, thereby not impacting drydock time. And since installation is non-evasive, it can also be done at sea without disrupting passengers and crew.

Signage & Exhibit Companies

Achieve the upscale look and feel of woodgrain on your signage and exhibits.

Ideal when looking to achieve a chic look on sign backers and ADA signage.

Easy to install air release adhesive makes Belbien perfect for rental exhibit customizations.

5 year warranty on Belbien EX exterior film.

Belbien EX

Exterior Belbien comes with a five (5) year warranty and is available in 40 patterns.

It's the perfect solution for exterior signage or modernizing old building exteriors.
